

Statistics in Python Course

Based on the course https://www.sib.swiss/training/course/20230620_STATP

Swiss Institute of
Bioinformatics

[Wandrille Duchemin.
Introduction to Statistics with Python
<https://doi.org/10.5281/zenodo.15607543>]

Statistics in Python Course

- Session 1 – Data visualisation & exploration
- Session 2 – Distributions & hypothesis testing
- Session 3 – Statistical testing, continued
- Session 4 – Correlation & regression

<https://www.elixir-czech.cz/events/statistics-in-python-06-2026>

Swiss Institute of
Bioinformatics

Statistics in Python Course

At the end of the course, you should be able to :

- explore your data, choose the right method to summarize it, graphically and numerically.
- perform appropriate basic hypothesis tests on a data set,
- appraise the results and limitations of these tests, their underlying hypotheses, and multiple testing issues,
- assess and describe the link between different variables, using correlation and regression analysis.

Statistics in Python Course

Morning: Data Visualisation & Exploration

09:30 – 09:40 Welcome & course overview

09:40 – 10:10 Lecture

10:10 – 11:40 Hands-on session

11:40 – 12:40 Lunch

Afternoon: Distributions & Hypothesis Testing

12:40 – 14:10 Lecture

14:10 – 15:10 Hands-on session

15:10 – 15:25 Break

15:25 – 16:25 Hands-on session

Statistics in Python Course

- Eduroam WiFi is preferred
Free WiFi is an alternative
- AC sockets are below the desks
- Please sign the attendance list 😊
- Any technical difficulties?
- Any specific requirements?

Introduction round

- Your name
- What do you do?
- Why you join the course
